DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 48 and 49 are rejected under 35 U.S.C. 102(b) as being anticipated by Lott.

The patent to Lott discloses a poker-type card game table comprising a dealer hand area 80 and at least one player hand area 90. Lott's table further comprises a plurality of betting locations located proximate an outer perimeter of the table. Each betting location having an ante wagering area "A" 30 for wagering a first amount that a completed player hand will have a higher poker value than a completed dealer hand, a bet wagering area "D" 40 for wagering a second amount that a completed player hand will have a higher poker value than a completed dealer hand, a raise wagering area "DD" 50 for wagering a third amount that a completed player hand will have a higher poker value than a completed dealer hand, and a bonus wagering area "JP" 60 for wagering that one of said player hand and said dealer hand will achieve a poker hand having a predetermined value (Dealer's hand contains 7 sevens, Player's hand contains 5 sevens).

Allowable Subject Matter

3. Claims 1-47 and 50 are allowed.

Art Unit: 3712

4. The following is a statement of reasons for the indication of allowable subject matter: None of the cited references alone or in combination teach the claimed "dealing an initial predetermined number of cards", "identifying a first subgroup of said initial predetermined number of cards having a relatively high poker value as compared to a remaining number of said initial predetermined number of cards not in said first subgroup", "assigning said first subgroup having a higher poker value to a dealer as an initial dealer hand", "assigning said remaining number of said predetermined number of cards not in said first subgroup to at least one player as an initial player hand", and "selecting as a winning hand whichever of said dealer blackjack hand and each said at least one player blackjack hand that has a higher blackjack value; one of dealing, removing and not dealing at least one card to said at least one player blackjack hand to achieve a first initial poker hand of three cards; one of dealing, removing and not dealing at least one card to said dealer blackjack hand to achieve a second initial poker hand of three cards".

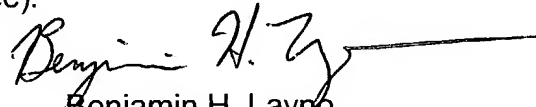

5. The patents to Yurkins and Conklin et al. disclose poker-type cards games having ante, bet, raise and plus or bonus wagering areas.
